

1doc⁺ Digital Twin

Experience the power of the 1doc Digital Twin in improving the way you understand and manage your health.

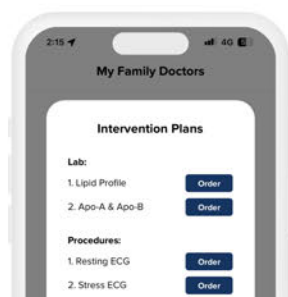

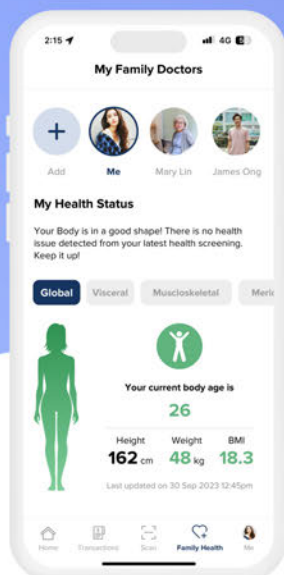

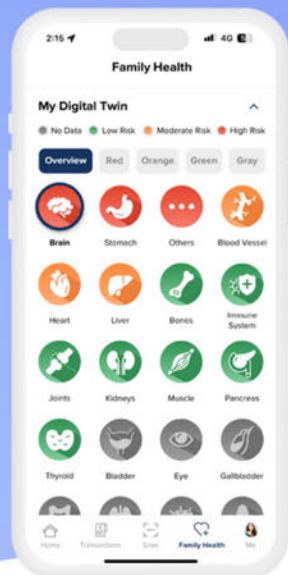

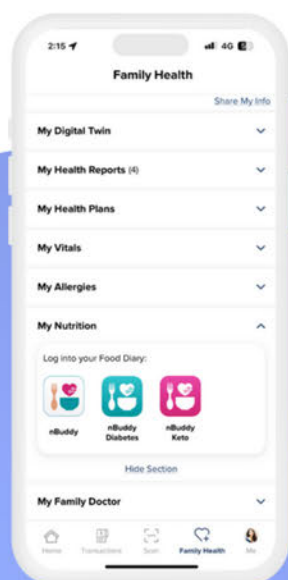

Introducing the 1doc Digital Twin

The 1doc Digital Twin is a tool that allows you to visualise your health data, including your lab results, medications, and medical history. It can be used to help you understand your health, track your health over time, and identify trends, based on your health reports.

- ✓ Gain a holistic view of your health
- ✓ Receive personalised treatment pathways
- ✓ Empower yourself for better well-being

Enhancing your Health Journey

Personalised Care Plans

At 1doc, we offer care plans that are developed based on the individual needs of our patients. These plans are developed in collaboration with our team of healthcare professionals based on your medical history, current condition, and treatment goals.

Real-Time Monitoring Of Your Health

Monitor your health data in real time. The 1doc app can send you alerts if there are any changes in your health data. This information can help you understand your health.

Visualise Your Health Like Never Before

Digital Model of Your Health Status

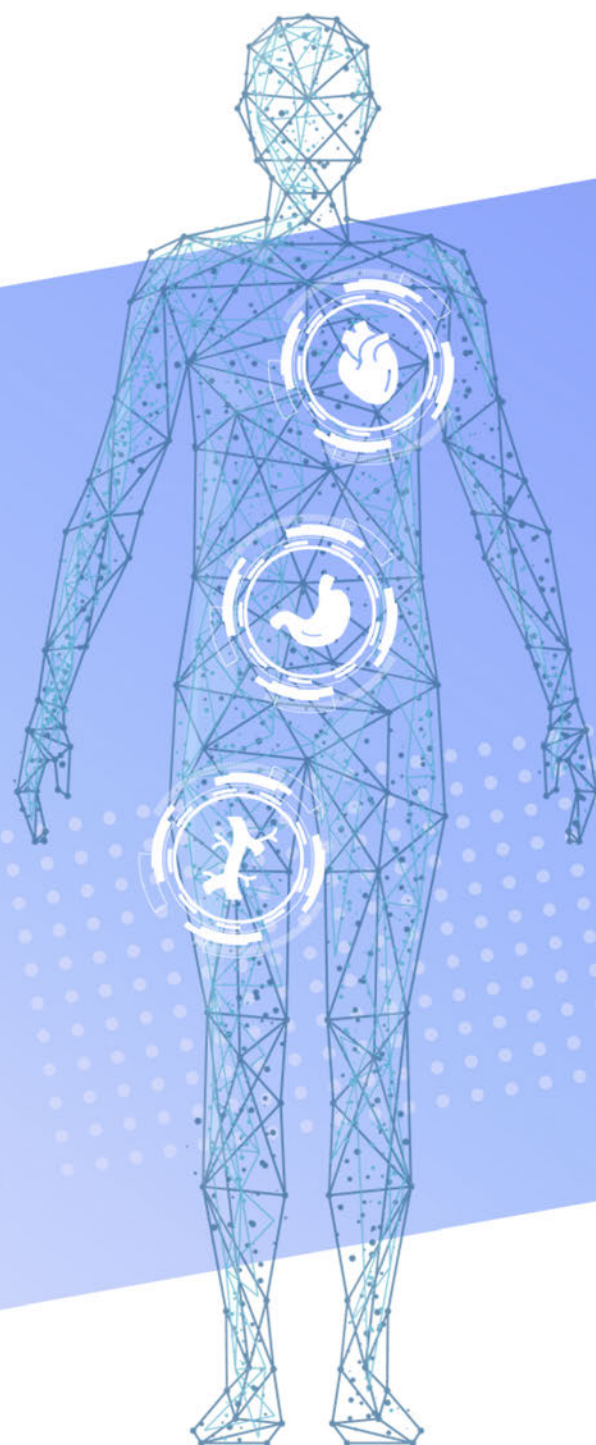

By analysing your health reports and relevant data, the 1doc Digital Twin creates a digital simulation of your overall health status based on your health reports and relevant data.

Real-Time Visualisation on a Body Map

Our in-app homunculus visualisation allows you to see how your lab results are mapped to specific organs. This can help you to understand how your body is functioning, based on your health report.

Personalised Treatment Pathways

The 1doc Digital Twin uses advanced machine learning techniques to generate personalised treatment pathways based on your unique health profile. These pathways can be used to help you make informed decisions about your care.

Transform your health
with your 1doc Digital Twin.
